

Universal side cutter foot

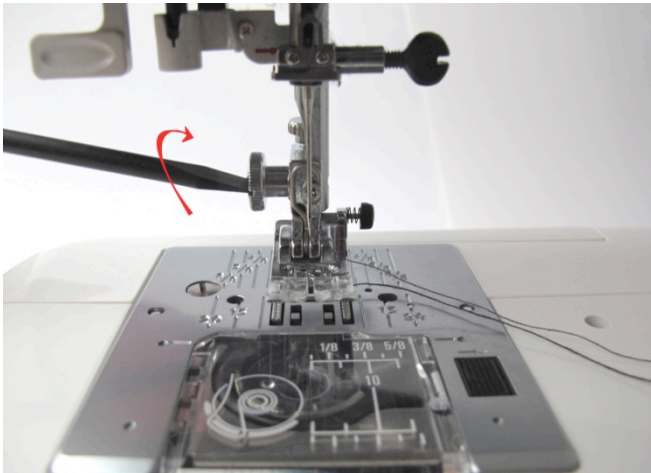

With this foot you can create a finish on your regular sewing machine that looks like the finish that you create with a over locker.

The foot is mounted instead of your normal foot by clicking into place on the foot holder (photo 1, 2 and 3). Choose a straight stitch or a zigzag stitch (picture 4) to trim while you sew a beautiful straight seam.

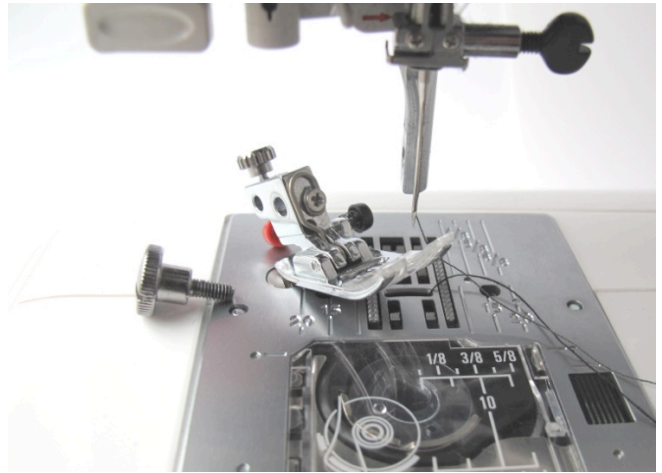

The width of the selected stitch cannot exceed 5 mm.

Before you start, make a cut into the edge of the material of about 1.5 to 2 cm (photo 5). Push the material under and over the foot as shown (photo 6) and sew the seam as usual.
